

OneGram

The Gold-Backed Crypto Revolution

Physical Gold Backing

Every token secured by real, tangible gold assets with a guaranteed value floor

Solana Technology

65,000 TPS with \$0.00025 fees - lightning fast and ultra-efficient

Shariah Compliance

First cryptocurrency certified compliant with Islamic finance principles

Institutional Security

Dubai-regulated with enterprise-grade governance and transparency

The Problem: Crypto's \$3 Trillion Volatility Crisis

150%+

Bitcoin Volatility

Extreme swings deter institutions

15,000+

Unbacked Tokens

Speculative assets with no intrinsic value

1.8B

Muslims Excluded

\$3.8T purchasing power sidelined by non-compliance

73%

Institutional Barriers

Cite volatility as primary investment obstacle

Key Market Problems

No Value Floor

Digital assets can lose 100% of value with no tangible backing

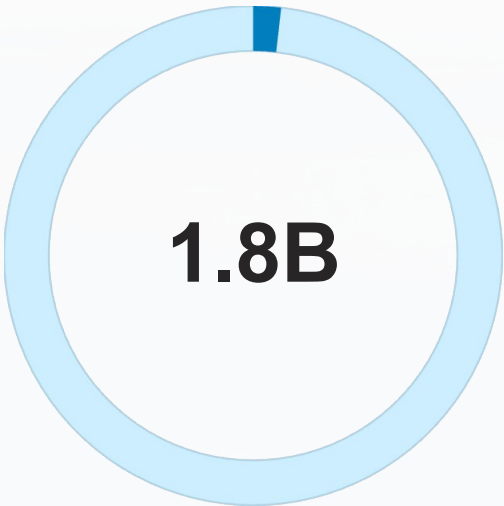

Religious Non-Compliance

Islamic principles prohibit speculation and excessive uncertainty

Institutional Paralysis

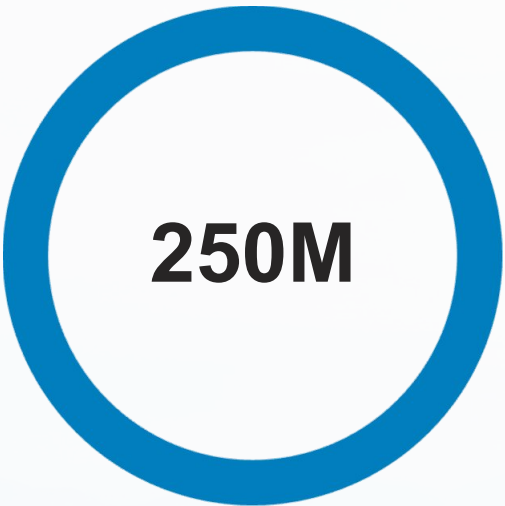

Fiduciary duty demands stability that crypto can't provide

Massive Market Opportunity

Global Muslim Population

\$3.8 TRILLION purchasing power seeking ethical finance

Pakistan Market

3rd largest crypto adopter, 98% Muslim population

Institutional Opportunity

Conservative estimate at scale penetration

Geographic Focus

Pakistan

- 3rd globally in crypto adoption
- 98% Muslim population = 250M addressable market
- Critical missing piece: Shariah-compliant options

MENA Region

- Dubai regulatory advantage
- Bridge between East and West
- Deep Islamic finance expertise

Global Islamic Finance

- 6.2% annual growth
- Underserved digital asset market
- First-mover advantage opportunity

OneGram Solution: Revolutionary Architecture

Acquire OGC Tokens

Each token represents 1 gram of physical gold

Gold Procurement & Storage

Equivalent gold immediately purchased and stored in audited vaults

Blockchain Verification

All holdings recorded on Solana for real-time transparency

Physical Redemption

Exchange digital tokens for actual gold through global network

Competitive Advantages

80% Less Volatile

Gold's historical stability vs crypto extremes

Lightning Fast

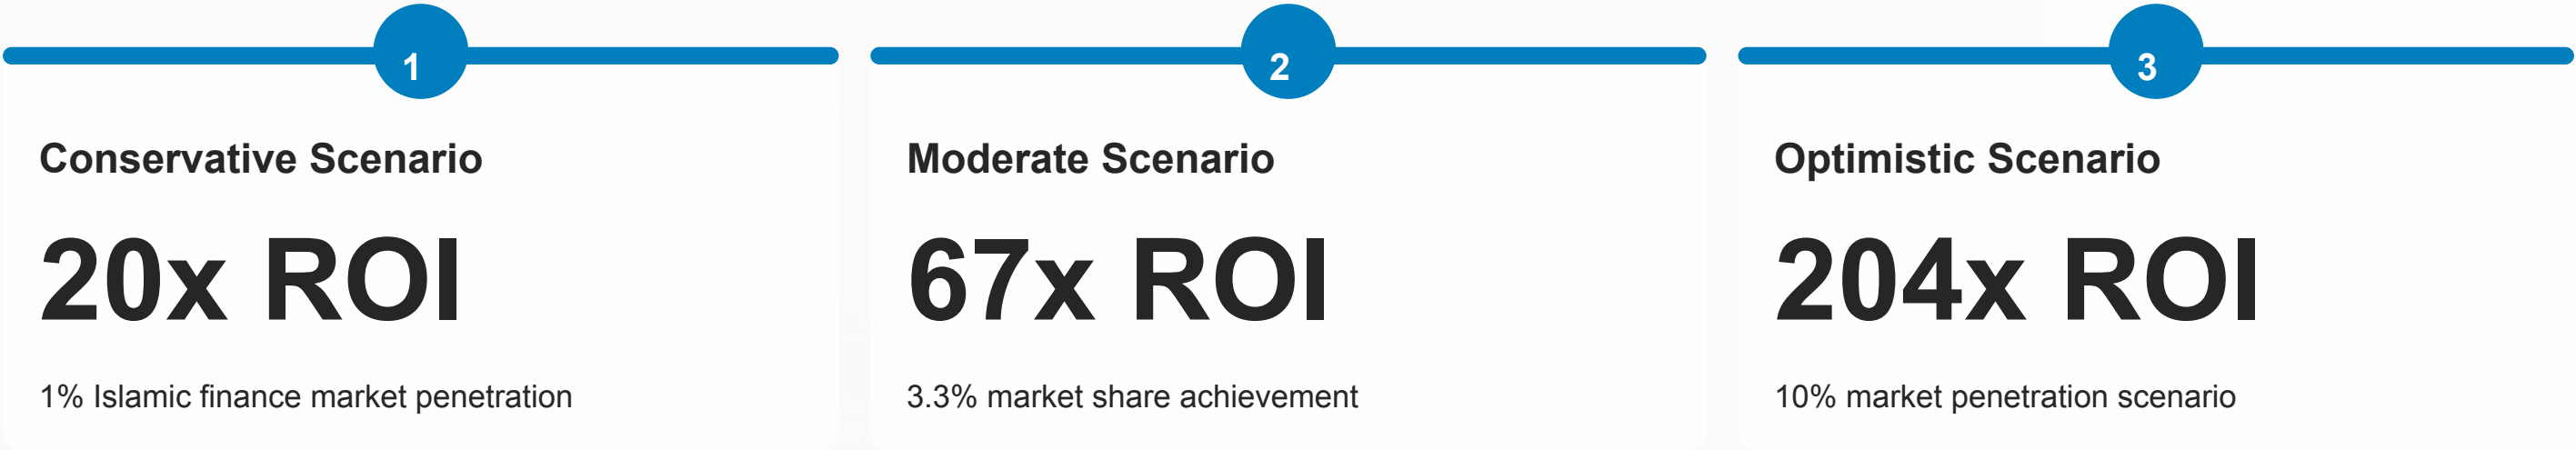

Solana's 65,000 TPS vs traditional gold settlement delays

Shariah Certified

Access to 1.8B underserved Muslim investors

Investment Returns: 20x to 204x Potential

Investment Structure

Private Sale: \$150 per OGC

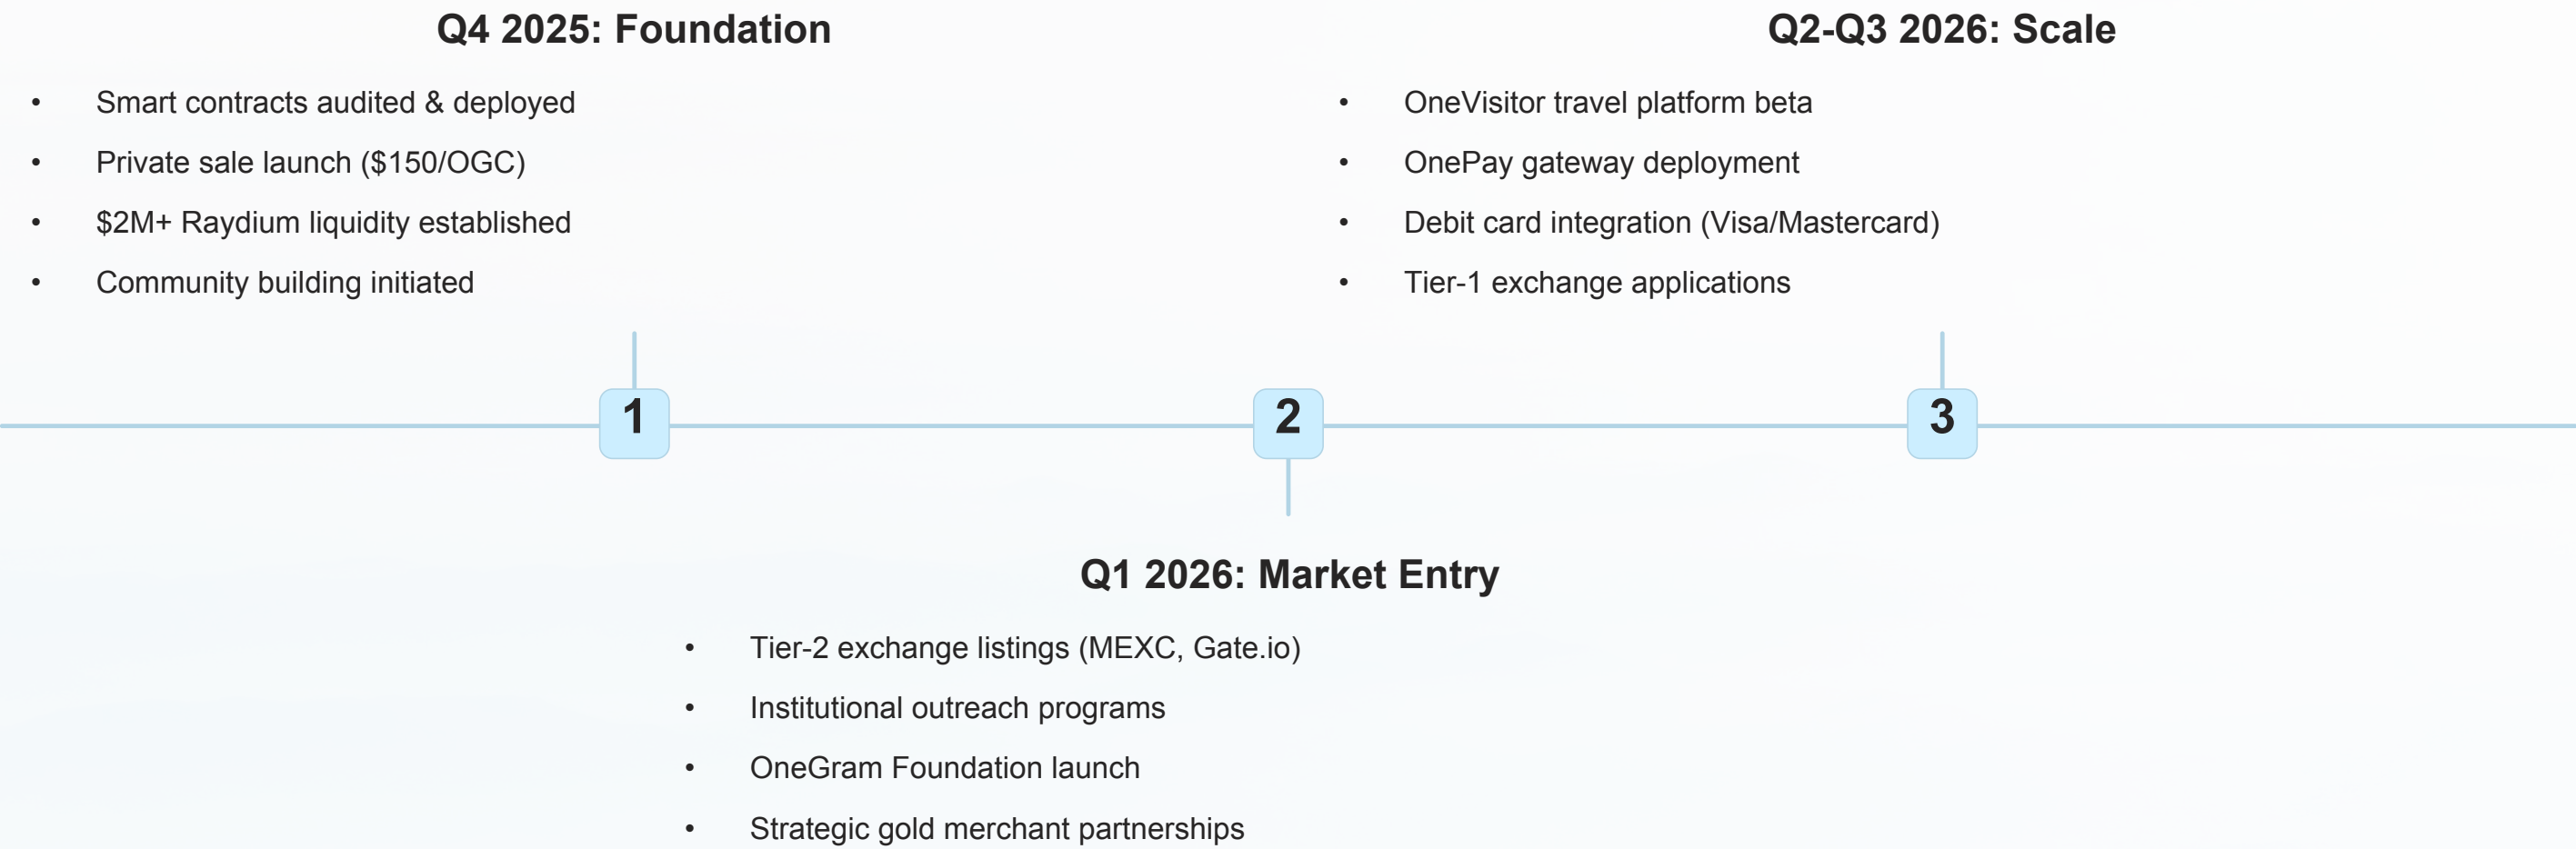

Total Supply: 12.4M OGC (50% of Bitcoin's cap)
Payment Options: Bank transfer, BTC, ETH, SOL, stablecoins
Strategic Allocation: Growth, liquidity, operations balanced

Triple-Asset Protection

50% → Physical Gold (PAXG) - Value floor
25% → Liquidity pools - Trading depth
10% → SOL holdings - Ecosystem hedge
15% → Growth & operations

Even 0.1% of Pakistan's population investing \$100 each generates \$25M market cap impact, adding ~\$2 value per OGC from this single segment alone.

Execution Roadmap: Building Value

Risk Mitigation Strategy

- Technical infrastructure secured before public launch
- Liquidity guaranteed before market entry
- Tier-2 validation before Tier-1 applications
- Utility development alongside trading infrastructure

Investment Thesis

Join the Golden Future of Digital Finance

Unshakeable Stability

Gold-backed value floor eliminates total loss scenarios

Ethical Compliance

First-mover in \$3.8T underserved Islamic finance market

Explosive Growth Potential

20x to 204x returns targeting massive addressable market

Technical Excellence

Solana's speed meets gold's stability - perfect convergence

"Ground-floor access to a revolutionary asset class that bridges 5,000 years of gold stability with cutting-edge blockchain innovation."
